To Whom It May Concern:

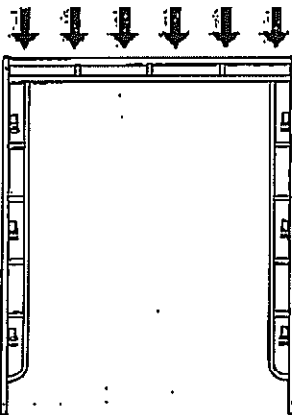

The purpose of this letter is to certify that the Open End Sidewalk Frame – part number 6004-60000 and 7004-60002 – designed and manufactured by Bil-Jax Inc., Archbold, Ohio, will meet or exceed the requirements of applicable standards, namely the Uniform Building Code 1997 (UBC), and the International Building Code 2003 (IBC), as interpreted by those whose signatures appear below. The Open End Sidewalk Frame has a maximum uniform load capacity of 1100 lbs. / lin. ft. applied along the top horizontal member of the frame and a maximum leg load capacity of 3300 lbs. when properly assembled and erected according to the instructions supplied. These frames are not intended to be stacked.

Sincerely,
Bil-Jax Inc.

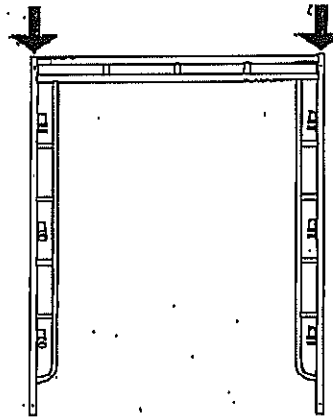

David A. Brinegar
Director of Engineering

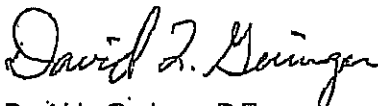

UNIFORM LOAD CAPACITY: 1100 lbs./lin. ft.

MAX. LEG LOAD CAPACITY: 3300 lbs. Per leg

I, David L. Geringer, have checked the load capacity of the above mentioned sidewalk frame and concur with the loads indicated above.

David L. Geringer P.E.
Consulting Engineer
